THE CATALOGUE PRICES

Please note that our prices include VAT @ 15%. All prices in this catalogue are correct at the time of going to press at March 1988 and our priority is to negotiate with our suppliers to keep prices constant for as long as possible, however, price adjustments may inevitably have to be made and therefore we reserve the right to alter prices without prior notice.

BUYING BY MAIL ORDER

Everything you need to know about buying by mail can be found on the special Order Form section at the back of this catalogue.

BUYING BY TELEPHONE

Credit card holders can telephone their orders direct by phoning **Luton (0582) 471700** (24 hour answering service).

THE WAYS TO PAY

1. Cheques. (Please do not send cash through the post).
2. Postal Orders.
3. Credit Cards. We accept the following credit cards:
Visa, Access, American Express and Diners Club.
4. Countdown Card holders welcome.

CARNOISSEUR SERVICES

Customer Advisory Service: Enquiries and product information can be answered by telephone on LUTON (0582) 471700. Also a 24 hour answering service will accept your message any hour of the day or night and your enquiry will receive our prompt attention. Export enquiries are welcome. Please write for details and quotation.

TRADE DESCRIPTIONS

Every care has been taken to ensure description and specifications are correct at time of going to press at March 1988. We must, however, reserve the right to alter prices and specification without notice as circumstances dictate. Although the colour printing in this catalogue is a good representation, slight variations must be expected. All products are offered subject to availability.

All Prices INCLUDE VAT at 15%. Please remember this when comparing prices.

BBS AERODYNAMICS

BBS aerodynamic parts allow owners to increase their vehicle's performance - at the same time making a statement of individuality and style.

BBS aerodynamic styling is classical, born of the laws of the air flow, yet beautifully matched to each vehicle's distinctive look. Each aerodynamic design is wind tunnel-tested to optimise efficiency.

All BBS components are constructed from reaction injection moulded polyurethane which retains elasticity

even under extreme temperatures. Slight impacts are effortlessly absorbed without deforming the original shape. All BBS aerodynamic parts are chemically pre-treated, tempered and primed with a neutral coloured elastic primer to guarantee optimal paint adhesion.

With BBS you're out on your own.

Post 1985 Front Spoiler illustrated.

KAMEI BODYSTYLING

Kamei Spoilers are manufactured from DUROKAM, a high impact lightweight co-polymer material, specially developed by KAMEI. The advantages are:

- Increased impact resistance
- Dimensional stability
- Exact fitting
- Easy to paint

The impact resistance and dimensional stability have been clearly demonstrated in extensive tests.

See Better—Look Smarter Hella Auxiliary Lamp Grille Sets and Spoilers

Transform your car into an exclusive vehicle with extra safety features. The tailor-made Hella spoiler and grille range offer everything you need to improve your car's appearance, its lighting and its aerodynamics. Hella auxiliary lamp grille sets give your car a dynamic, exclusive look. The integral auxiliary lamps provide vital extra safety. Hella front spoilers underline this exclusive look, improve the aerodynamics and, with fitted auxiliary lamps, provide extra lighting power. Hella rear spoilers improve the aerodynamics of the back of your car, and improve the handling as a result. The spoilers also make the rear of your car more exclusive in appearance.

Quality without Compromise

- All spoilers have been developed in the wind tunnel.
- Grilles are specially designed for each car model.
- The tough plastic ensures the grille keeps its shape.
- Grilles and spoilers fit precisely and are easy to mount.
- They can be painted in any colour.

FIBRESPORTS

FIBRESPORTS

Fibresports design and manufacture acrylic and glassfibre products for major Automotive companies, both in the UK and Europe. Fibresports also produce a large range of their own mouldings including the original Ford 'X' pack Zakspeed Kits, which were initially produced for Ford UK. They have now further developed the 'X' pack theme into the dramatic Double XX kit for the Capri model. The Fiesta Z, Warrior, Maverick and Renegade kits are all further examples of their in house design capability.

Comprises: Front Spoiler, 4 Wing Arches, brake cooling ducts, pair Inner Arches, Petrol cap flap.

FS1009 £171.35

CPT MOTORSPORT

CPT MOTORSPORT bodystyling kits are based on proven designs to improve both the looks and performance of your car.

As well as offering complete conversions they also offer individual panels which, on their own, provide many of the aerodynamic and visual benefits of the full kits but at much lower cost.

Many parts are manufactured from either RIM Polyurethane which is flexible and absorbs minor impacts without damage or from KEVLAR, a material which is 5 times stronger than steel and to all intents and purposes, indestructible.

All parts are finished to a high standard to ensure easy fitting and a minimum of preparation is required before painting.

PORSCHE—924/944

CARRERA GT style bodykit for 924 and 924 turbo comprising front bumper/spoiler, front wings, bonnet scoop, side sills, rear wheelarch flares, rear bumper. **£574.94**

Body Styling

STYLING KITS

- These attractive and functional Styling Kits are designed for the discerning motorist who wishes his car to 'Stand out from the crowd'.
- The Styling Kits are a combination of Front Spoilers, Rear Spoilers, Wheel Arches and Side Sills, and can be purchased individually or as a complete kit.
- All parts are manufactured from high impact resistant ABS plastic with the exception of the Rear Spoilers which are in Semi-Rigid Polyurethane.
- The complete kit can be sprayed to colour-match your car, or left in contrasting black if required.
- Kits come complete with comprehensive fitting instructions, and are easily fitted.

AUTOPLAS

Body Styling

More and more discerning motorists are realising that a visor does something for what would otherwise be just an ordinary car. That something is style, and we feel that you will appreciate this opportunity to obtain one of the most exciting accessories on the market. On the practical side visors protect your rear seats and passengers from the sun, and help keep the interior cool when parked in the open. A clear rear view is maintained by aerodynamic flow deflecting rain and dirt off the rear window, and even in winter, frost and snow fall on the visor not on the glass. Ample space is allowed for cars with rear wipers.

Rear Screen visors are available for almost any car and are designed, developed and made in England by Auto-Plas, a leading European auto accessory manufacturer. Fitting is simple, with no drilling or screwing required, and the visor is securely retained under all conditions, even through a car wash. When ordering state clearly your car's make, model year of manufacture and specify whether a rear wiper is fitted.

Wheels

Wheels

RZ Wheel

ALLOY WHEELS—A MARK OF DISTINCTION

There's no motoring accessory that marks a car so far apart from the common horde as alloy wheels. With their unique combination of styling, flair and purposeful performance image, a set of alloys is the signature of a car of sophistication. That may be your sole purpose for a purchase of wheels but you should also be aware that these finely engineered pieces of hardware, produced and

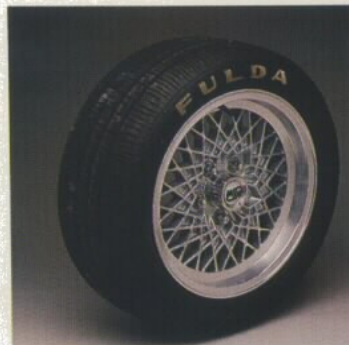

tested by ultra-modern techniques, have some considerable practical value. First there's the weight saving over cheaper production steel wheels. This gives small fuel economy gains and a little bit of extra performance but the major advance is in the reduction of unsprung weight which can show improvements in ride and handling characteristics. New wheels also open up to you the possibility of changing tyres—perhaps the greatest leap forward in handling, steering, response and braking that you could make would be a switch to the latest ultra-low profile designs pioneered by Pirelli's renowned P7 and P6 tyres.

SELECTING THE RIGHT WHEEL AND TYRE

There are two critical measurements to be made in matching an alloy wheel to your car. The type of wheel stud fitting is a combination of the number of studs (4 or 5) and a measure of the diameter of the circle drawn through the centre of the stud holes (known as the PCD). The wheel offset and whether it is a positive (inset) or negative (outset) dimension is also important (see diagram). But don't worry too much if you are simply replacing your existing steel wheels by alloys of the same dimensions. Our comprehensive reference service will give you the exact model application you require. To step up to a wider wheel or, possibly, a larger diameter in

conjunction with lower profile tyres you may need to take some expert advice—it is a service we are only too glad to offer.

Selecting tyres is considerably more complex. You must always bear in mind that the lower the profile of the tyre you would like to use the greater the wheel diameter may have to be

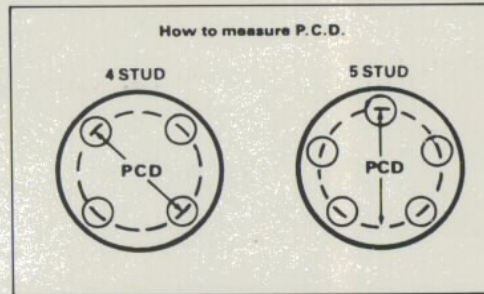

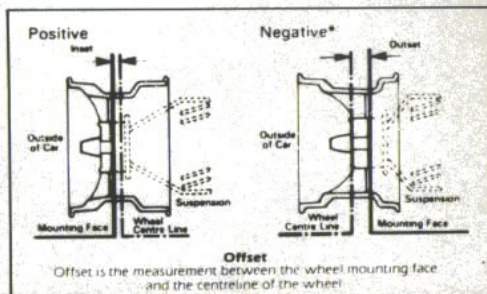

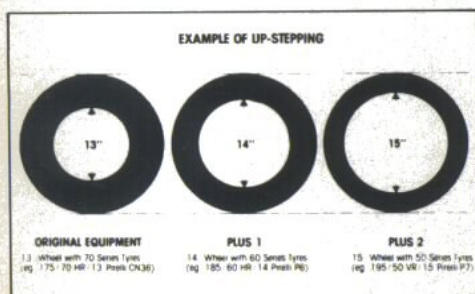

to preserve the same rolling diameter so there is no change in the car's overall gearing and the speedometer and odometer remain reasonably accurate. To take full advantage of lower profile tyres the tyre and rim width must be increased. As there is a limit to the clearances under the wheel arch great care should be taken to ensure that the tyre is not too wide.

Only careful cross-referencing between the wheel application list and the catalogues of the tyre producers will reveal the maximum tyre and wheel size that any model of car can take without extensive

modification to bodywork or brake and suspension configurations. Note that the profile of a tyre (also known as the aspect ratio) is an expression for the ratio between tyre height (from bead to tread) and tyre width. Standard tyres are approximately 80-85% profile, earlier lower profile designs now in widespread use are 70% while the latest ULP designs like the P6 and Dunlop D3 are 60-65% profile. The lowest profile of all is presented by the very specialised P7 design at 50%.

THE ADVANTAGES OF ULP TYRES

The breakthrough to lower profiles than 70% was made by Pirelli, a company whose researchers recognised that energy absorption by the tyre could be reduced if the tyre height was reduced and the reinforcement of the tread area made extremely strong. This limits the flexibility of the sidewall and improves steering response. The fact that the tyre is wider gives enormous improvements in grip both for braking and roadholding as well as resisting breakaway under hard acceleration. The P7 tyre was the revolutionary upshot of this thinking but to gain much wider appeal it needed the P6, a tyre that can be mass-produced and used successfully on lesser machines. Most other major tyre manufacturers now produce ULP tyres with profiles in the 60-65% range.

Wheels

BBS WHEELS

BBS, quite simply—the best money can buy. These precision engineered German wheels are fitted as original equipment on some of the world's most exotic cars. Their pedigree of excellence has been moulded through years of motorsport successes. With BBS you're out on your own. The 1988 range comprises three similar styles constructed from three very different technologies: Applications for AUDI, BMW, FERRARI, FORD, JAGUAR, MASERATI, MERCEDES, PORSCHE, VOLKSWAGEN, VOLVO.

RS Wheel—three piece modular rim

The ultimate of all road wheels, it is a direct development from the BBS racing rim. The centre section is made of forged aluminium as are the cold rolled inner and outer rim halves giving superior strength and lightness of weight, RS wheels are supplied with either silver or gold centres and polished rims.

7 x 15 from	£285.20 each
8 x 15 from	£302.45 each
7 x 16 from	£330.05 each
7½ x 16	£355.35 each
8 x 16 from	£342.70 each
8½ x 16	£371.45 each
9 x 16	£376.05 each
9½ x 16	£385.25 each

RG Wheel—Single piece forged rim

State-of-the-art technology from BBS. The forged RG wheel is pressed into a single piece from a specially developed alloy and then formed under 14 million pounds of pressure. The result is a wheel of the highest density, increased load capacity and exceptionally light weight, RG wheels are offered only in exclusive platinum finish with polished rim.

7 x 15 from	£285.20 each
7 x 16	£347.30 each
7½ x 16	£347.30 each
8½ x 16	£359.95 each

RZ Wheel—Single piece cast rim

The latest development of the BBS pressure die cast range of rims. the RZ incorporates the new centre lock styling first introduced on the modular wheels. Colour options include silver, silver face with polished rim and gold face with polished rim.

6½ x 14	£147.20 each
7 x 14 from	£170.20 each
7 x 15 from	£147.20 each
7½ x 16 from	£236.90 each
8½ x 16	£257.60 each

M.S.W./O.Z. WHEELS

As supplied to Lamborghini and the Alfa-Romeo Formula One Team, M.S.W./O.Z. Wheels are manufactured in Italy to meet all international safety standards. All wheels are supplied complete with nuts/bolts ready to fit.

All wheels undergo dimensional and radioscopic checks and must pass tubeless tests.

Along the manufacturing line, destructive tests such as stress test (bending test), SAE/cornering test, rolling test, salt spray test, are carried out on wheels chosen at random. Before coating, the wheels enter a surface treatment tunnel to protect the metal. A proper anti-corrosion prevention is performed using a degreasing process, phosphochromatation, final rinsing by demineralised water. Finishing is diversified, coating technique varies using both liquid and powdered lacquers, alternatively or in combination. M.S.W./O.Z. Quality assured.

LOCKING WHEEL NUTS AND BOLTS TRILOCKS

Carflow Trilocks have been carefully designed to provide security for your valuable wheels and tyres, whilst being safe and practical to use.

- Suitable for alloy and steel wheels.
- Fitted in minutes—just replace one nut/bolt per wheel.
- Approved and used by major vehicle manufacturers.
- Lightweight design—no need to re-balance your wheels.
- Corrosion free.
- Over 250 different key combinations.
- Wide range available for virtually all cars.

Trilock Nuts (Set of 4)

CF2001 £17.19

Trilock Bolts (Set of 4)

CF2002 £19.49

Please specify car make, model, year and whether for alloy or steel wheels when ordering.

WHEEL CLEAN SPRAY

Keeps your wheels looking like new. Acid free. Trigger Pack.

CF2007 £2.88

BILSTEIN

The name Bilstein is synonymous with sporting character and unbeatable roadholding. Bilstein suspension kits are designed to give maximum performance whilst maintaining a safe reduction in ride height. The sports kit contains specially tuned shock absorbers matched to the reduced height of the springs and where necessary include modified rubber brushes for the axle mountings.

MONROE FORMULA GTi KITS

A new level of style, performance and comfort—The Formula GTi Kit from Monroe. The kit contains a set of Monroe gas-pressurised struts or shocks for front and rear axles. It also includes a set of special high-performance coil springs giving the precise spring resistance needed. It lowers the car by approx 35 mm (approx 1 3/8 ins). **Warranty: 2 years with unlimited mileage.**

Monroe Formula GTi gives your car new, low-slung good looks and a decidedly livelier feel. Aerodynamics are improved and you'll notice the difference in roadholding and fuel economy. A perfect balance between roadholding and comfort thanks to gas-pressurised shock absorbers. Something you'll appreciate on long journeys or if you're driving over rugged or uneven road surfaces. **TUV Tested and Approved** Every Monroe Formula GTi kit is tested and approved by Germany's TUV—the official body that is responsible for ensuring that products meet the highest standards of performance and safety. The kit is designed to achieve its improvements without affecting the car's basic specifications. Once fitted, you can still carry the same load, tow a trailer or fit wide tyres if you wish. Easy to install, no additional parts required.

kar-rite

With carrying capacity equal to a normal car boot, the Kar-rite 340L securely encloses luggage, sports gear, etc. to reduce overcrowding in your car.

The Kar-rite concept provides excellent security, convenience, and minimum wind-resistance. The carrier is designed to fit neatly on to any car roof with or without a roof rack. Made of high density moulded plastic, it is tough enough to hold the heaviest luggage (up to 50 kilos) and brave the worst weather conditions. The Kar-rite 420L is the big sister to the 340L, for people with a lot to carry.

kar-rite 340L

- double cylinder locks
- fits to roof bars (roof bars not included)
- or fits directly to car roof (all fittings included)
- 12 cu ft capacity
- Dimensions: 112 cm (L) x 97 cm (W) x 41 cm (H)
- Lightweight: 11 kgs.

KR340L £113.85

kar-rite 420L

- same specification as 340L except:
- 15 cu ft capacity
- Dimensions: 112 cm (L) x 97 cm (W) x 48 cm (H)
- Lightweight: 13 kgs.

KR420L £132.25

KAMEI

The universal space-maker

Having a 450 litre capacity, the KAMEI TRAVELLER-BOX and its smaller sister, the HOBBY-BOX having a 240 litre capacity, offer a tremendous amount of space for larger and bulky objects. Mounted on any commercial roof-rack (with a horizontal supporting beam having a width of 35 mm or 1 3/8"), the KAMEI-BOX can be used for transporting weights of up to 110 lbs. or 50 kg. Since it can be used throughout the year in rain, wind and snow, the KAMEI TRAVELLER-BOX is an ideal addition to the limited space of a boot.

The aerodynamic style, tested in the wind tunnel, and the highly impact-proof lightweight DUROKAM® material developed by KAMEI ensure that no additional driving noises or appreciable extra fuel consumption are caused.

Two gas-pressure lifting devices, activated from the driver's side, keep the lid wide open until everything is

stored away and secured from movement by the use of fastening belts. The two safety locks are fitted with protective covers to keep them free of dirt and prevent them from freezing. Adjustable insertable racks, for up to six pairs of skis, which have been especially developed for the TRAVELLER-BOX are available as accessory equipment. The champagne-white HOBBY-BOX and TRAVELLER-BOX can be painted to match the colour of your car. The sportsmanlike elegant luxury versions are already fully coated with silver metallic coating.

The KAMEI roof carry-all solves your space problem in the best, aerodynamic form.

LIGHTGUARDS by SMOOTHY

Lightguards—added security and style

Smoothy Lightguards are moulded acrylic covers that not only protect your headlamps from damage—but the expense and inconvenience that follows—but actually improve the appearance of your car.

For the cost-conscious motorist . . .

Not only is the cost of replacing broken headlamps high but there are fitting charges and the inconvenience of being off the road, too.

- Specially designed clips for lens security and easy removal for cleaning.
- High-strength acrylic foam self-adhesive pads for trouble-free fixing.
- Lenses contoured to suit individual models and manufactured from impact-modified high-grade acrylic supplied by Europe's leading manufacturer.
- Fixing clip ultrasonically welded to lens.

JETEX EXHAUST SYSTEMS

Technology, Quality, Performance

with a sound that calls the tune

Jetex Exhaust Systems are manufactured in Sweden. Production takes place in a new purpose built factory. With Jetex Exhaust Systems the engineers have concentrated on solving a number of technical problems. A thorough programme of testing performance, fuel economy, noise and exhaust levels as well as back pressure to name a few have provided answers which give advantages in all of these areas combined with durability and purpose designed packaging.

General

Two basic methods can be used to dampen exhaust noise—absorption damping and reflection damping. The reflection method is cheaper as a rule, and technically easier to construct, but it has side effects among them high back pressure which reduces power output and frequently increases fuel

consumption. Absorption damping, however, while being technically more complicated to manufacture, has the advantage that the exhaust gases are removed efficiently so that neither performance nor fuel consumption are affected. Jetex Systems are of the absorption type.

Performance

Performance testing is carried out using computerised chassis dynamometers thus enabling different theories to be examined before deciding on the final design. Other important factors taken into consideration are back pressure, carbon monoxide levels, inlet manifold temperature and fuel consumption.

Noise Levels

It is a common misconception that sport systems automatically mean more noise. With Jetex designs the noise levels are always below the legal maximum, and comply with the officially approved noise levels for motor vehicles. All systems with the E prefix comply with the E.E.C. regulations.

Jetex systems at a glance:

- Swedish high quality steel
- Reduction in back pressure up to 82% for some applications
- Professional design
- Pleasant exhaust note
- Improved output compared with standard systems
- Easy to assemble
- Complete systems (unless original front pipe is indicated) with fitting kits
- 12 months guarantee
- Every Jetex system is boxed

EASIRIDER LAMBSWOOL® CAR FLOOR RUGS

For luxurious comfort, colour, warmth and sheer hardwearing durability, the most prized carpets in the world are still made of wool. Easirider Lambswool® pile rugs are hand-made to individual order from a special 25mm (1") pure new wool fibre which completely reproduces the look, feel and wear of natural sheepskin. An exacting dyeing and finishing process transforms the wiry wool pile into a lustrous textile fleece. Stripped of hairy barbs which cause wool to matt—mud, dirt and grit now drop to the base of the 'fibre forest', leaving the tops clear and clean. Regular shaking and vacuuming will be sufficient to maintain your rugs over many thousands of miles of hard motoring. Wool has the unique property of absorbing up to 1/3 its own weight of moisture before becoming wet—a

valuable asset for car floor rugs. Easirider Lambswool® rugs are made to the highest specification as adopted by many of the world's most prestigious motor manufacturers. The wool pile is mounted onto a plush, flame-retardant interlayer with special non-slip backing. A velour heelpad, which virtually eliminates wear on the backs of your shoes, is sewn into the driver's rug. Easirider's patented 'Cats Claw' mat grips are also fitted to the underside of the driver's rug and are available as an optional extra on the other rugs. When eventually you change your car the carpet beneath will be in mint condition.

Easirider Lambswool® rugs represent an investment in the most luxurious floor covering that money can buy. Stock colours: Champagne, Beige, Tan, Brown, Burgundy, Red, Black,

Silver Grey, Dark Grey, Mountain Blue, Navy, Deep Fawn, Cumberland 44, Green.

AZTEC

Electrically and Manually Operated Car Blinds

Aztec is the first Venetian blind designed to fit your car. It adds a unique style to any vehicle and in a choice of 4 colours: Black, Silver, White and Red. . .there's one that's perfect for you. Aztec puts individuality right into your rear window and gives you unprecedented control of your car's interior environment at the flick of a switch

When you're driving on a hot summer's day with the sun streaming through the back window your passengers can soon feel uncomfortably hot. The bright sun tires eyes and prevents relaxation. Use Aztec to eliminate dazzle but still give clear rear vision. Ideal at night. Headlamps glaring through your back window can be distracting and potentially dangerous. Aztec lets you filter out dazzle in your eyes without blocking rear vision.

Aztec unclips easily from its mountings for cleaning.

Available in Black, Silver, White or Red.

Electrically Operated
AZ2001 £49.40

Manually Operated
AZ2002 £26.46

HELLA SUN BLINDS

- Keep the sun's rays out.

KC DAYLIGHTERS

Incredible power. Incredible value. The KC Daylighter range offers lamps of unparalleled power. This 150 watt light generates a massive 350,000 candlepower with a useful reflective range approaching 4 miles. KC's are available with either the traditional housing and patented vibration resistant mounting or in Budget format which employs a more basic construction in chrome finish only. Both models use identical Westinghouse optical units. Because KC lamps were designed to use in competition they are ideal for high speed night driving anywhere. With an overall diameter of 6.25 ins, and a depth of 5 ins, the lamps are compact, which allows them to be mounted easily on most vehicles.

Daylighters come complete with yellow covers which are also available separately. 150w lamps are completely legal for use on UK public roads but, as with any auxilliary lights, they must be wired and mounted in accordance with the law.

HIGH LEVEL BRAKE LIGHT

An American study involved fitting 2100 Washington taxi-cabs with HLBL's and comparing their accident pattern with conventionally-equipped vehicles in all weather and traffic conditions.

The significant result which emerged from the study was that taxis with the HLBL were involved in 30% less day-time, and 54% fewer night-time rear end collisions than those conventionally equipped.

Even when rear end collisions occurred, the damage suffered by the vehicle equipped with HLBL's was considerably less than that suffered by the conventionally-equipped taxis.

The opinion of the U.S.A. Department of Transport was that by using a centrally-mounted HLBL, approximately 1.7 million accidents could be avoided annually.

Subsequent legislation was passed and all new vehicles registered in the U.S.A. since September 1985 have been fitted with a single, centrally-mounted HLBL.

However, the U.K. legal position is that,

- (a) A minimum of two brake lights must be fitted. There is no maximum with regard to the stop lights installed on passenger cars if the following legal fitting requirements are adhered to:
- (i) brake lights must be mounted above 400mm and below 1500mm from the ground; and
- (ii) must have a minimum separation distance of 600mm.

Therefore, if a HLBL is "E" approved as a brake light and is fitted in the correct manner, it is perfectly legal in the U.K.

It is perhaps significant that a major Scandinavian vehicle manufacturer, renowned for its lead in the safety features incorporated in its vehicles, are fitting centrally-mounted HLBL's as original equipment to vehicles imported to the U.K.

Hella are confident that all the evidence shows that HLBL's can play a major part in reducing nose-to-tail collisions.

Hella now have available a completely new universal HLBL designed for central fixing. This new lamp is suitable for either pendant or upright mounting and is suitable for saloons, hatchbacks and estate cars.

This new lamp is, of course "E" approved, it comes complete with comprehensive fitting instructions and all installation material.

SRD 500

SNOOPER SRD RADAR DETECTORS

ONLY YOU KNOW HOW IMPORTANT YOUR LICENCE IS TO YOU!

The Snooper Range of Radar Detectors has been developed to help the modern driver maintain a higher level of driving safety. Their design and build quality ensures that the user is provided with the most advanced protection available today. These fourth generation instruments have all the benefits of nearly 20 years experience in manufacturing detectors that are both accurate and reliable. The complete range is built around the very latest electronic components combining leading edge technology with rugged construction to ensure trouble free use under all conditions.

SRD370

Designed for the demanding motorist the Snooper SRD 370 is a true state of the art radar detector. Its exceptional range (over 2 miles) maintained through the use of advanced electronics provides the driver with the ultimate protection for today's difficult driving conditions. The SRD 370 incorporates a set of sophisticated filters which ensures that the detector is sensitive to radar signals whilst having a low susceptibility to other transmissions. The integrated range finder helps pinpoint radar sources whilst adequate warning is given through visual and adjustable audible controls. Easy fitment and removal features allow the unit to be stored for added security. Manufactured and tested in accordance with strict quality control and reliability standards, the SRD 370 provides absolute peace of mind for the serious driver.

SRD370

£229.43

SRD500

Combining all of the exceptional features of the SRD 370 with discreet installation, the Snooper SRD 500 Remote provides the discerning driver with a warning system ideal for the majority of vehicles on today's roads. The remote unit is small enough to be mounted in the most convenient position yet still features an LED range finder, city filtering system and adjustable volume control. The detector unit is based on the latest microchip technology using an advanced digital signal processing technique that receives then amplifies signals for easier, faster detection. This module is hermetically sealed against the weather and is designed to withstand vibration and shock loads. The SRD 500 Remote comes complete with a comprehensive installation kit with full instructions and is backed by our normal warranty.

SRD500

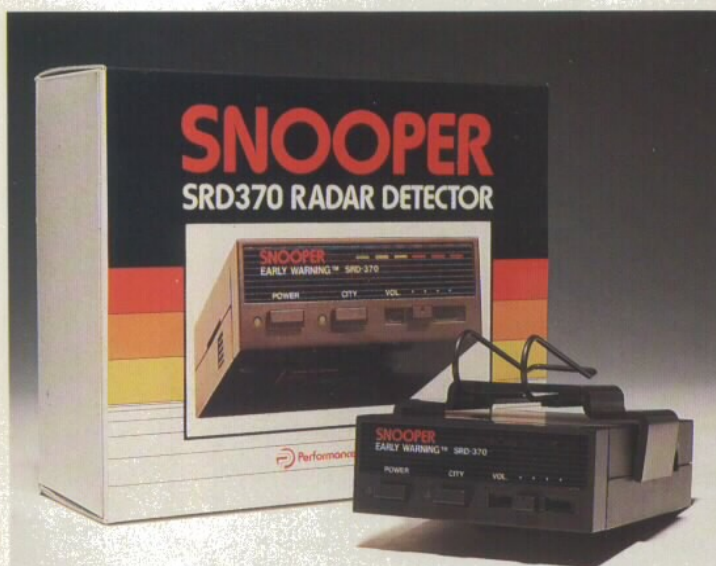

£344.43

SRD 350

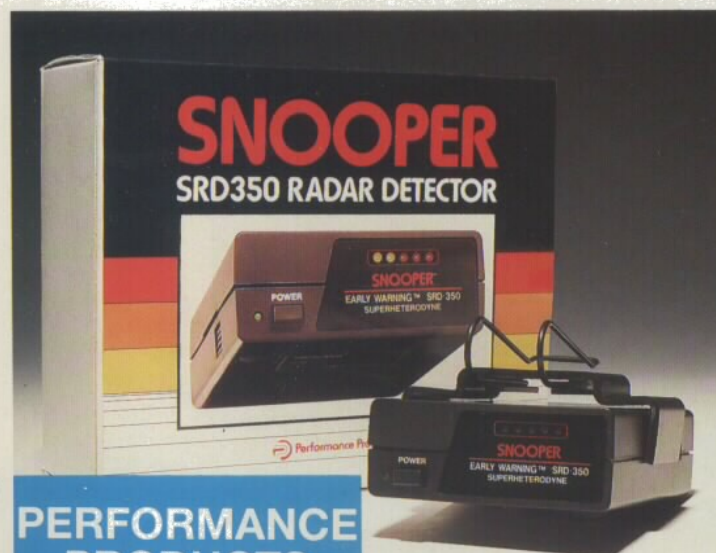

The Snooper SRD 350 combines the latest solid state electronics in a compact design to form one of the most reliable radar detectors available today. Based on the extremely successful 'long range Super Snooper' this budget priced instrument is ideal for both city and highway driving. The SRD 350 has a maximum range of around 1 mile, plus 'over the hill' and 'around the curve' capabilities. Both visual and audible warning systems are incorporated together with an LED rangefinder to pinpoint the radar source. The unit is easily fitted to either dash or visor and plugs directly into the cigar lighter. Backed by a full 12 MONTHS WARRANTY the SRD 350 provides excellent protection at a reasonable price.

CRUISE CONTROLS

WHY BUY A CRUISE CONTROL?

Cruise Controls have long been popular in the United States and understandably so. Long distances, open roads and speed restrictions make Cruise Controls almost a necessity. But gradually, European drivers are coming to recognise that a Cruise Control can also be meaningful over shorter distances and in heavier traffic conditions. They have discovered that not only does a Cruise Control prevent accidental speeding but also reduces fuel costs by up to 15%.

HOW DOES A CRUISE CONTROL WORK?

The 'heart' of the system is a microprocessor that memorises any speed chosen by the driver and, by regulating the throttle actuator, enables the vehicle to be maintained at that constant speed.

This means that once a speed has been programmed by touching the SET button, your foot can be taken away from the accelerator pedal. Whether up hill or down dale, the Cruise Control will adjust the movement of the throttle and hold the vehicle to the desired speed. For safety reasons, a Cruise Control does not operate at low speeds (normally less than 25 mph). It can be switched on or off at will and is immediately and automatically disconnected by pressing the brake pedal or, on manual vehicles, by changing gear. Touching the RESUME button will cause the vehicle to accelerate until it has reached the last set speed. Cruise Controls eliminate abrupt throttle movement and consequently reduce fuel consumption.

AP90

A breakthrough in terms of price for a basic Cruise Control. All parts supplied for complete installation. Suitable for dash or stalk mounting. Manual transmission vehicles require optional Electronic Clutch Switch AA146.

AP90 £79.50

AP110

Features as AP90 plus larger illuminated command module. For dash mounting only. Manual transmission vehicles require optional Electronic Clutch Switch AA146.

AP110 £99.50

AP120/AP220

Features as AP90 plus illuminated keys on control module. L.E.D. to indicate Cruise Control in operation. Electronic Clutch Switch included.

AP120 £104.50

AP220 (for Diesel and Turbo cars) £149.50

DCS350 (ZT-14)

AP90

DCS350 (ZT-14)

This Cruise Control combines all the features of the AP110 with that of a simple driving computer. A separate module, which houses the microprocessor, provides a digital display of actual speed, distance travelled and elapsed time on trip. The trip information is automatically re-set whenever the vehicle is started. Electronic Clutch Switch included.

DCS350(ZT-14) £119.50

TS101

New stalk-mounted Cruise Control module. Two L.E.D. indicators show state of operation. Fits AP120, AP110, and DCS 300.

TS101 £19.95

CRUISE CONTROL ACCESSORIES

ELECTRONIC CLUTCH SWITCH

For AP90 and AP110 (Standard on AP120 and DCS350/ZT-14).

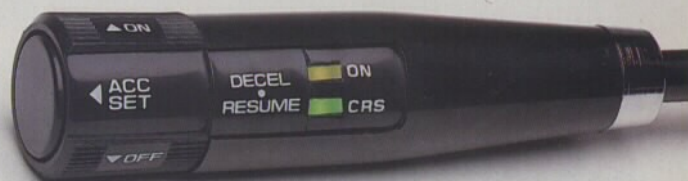

AA146 £9.50

MECHANICAL CLUTCH SWITCH (For Diesels only). Required for all Cruise Controls.

AA164 £9.50

All Zemco Cruise Controls are simply installed on most 12v vehicles and come complete with fitting instructions and all necessary hardware for the DIY enthusiast.

Zemco cruise controls have been tested and approved by the Automobile Association in the United Kingdom and by TUV in Germany.

PERFORMANCE TIMER

A really accurate measurement of acceleration time must be what many owners of high performance cars have been waiting for. No longer will it be necessary to rely on performance figures as published by the vehicle manufacturers.

The Performance Timer calculates electronically the acceleration times of a vehicle from 0-30 mph, 0-60 mph and a 1/4 mile from a standing start. It can also calculate the speed the car attained at the end of the quarter mile. After selecting the desired function, the Timer will provide an audible beep to let the driver know that the required speed or distance has been reached and that the data has been stored. Road speed can be displayed at any time, as required.

The Performance Timer is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions and all necessary hardware for the DIY enthusiast.

DE-740 £79.50

ZT 119

TIME AND TEMP

Another useful accessory. Designed to fit a standard radio aperture, the Time and Temp provides not only a 24 hour clock, a stop-watch and inside and outside temperatures but also an indication of battery voltage and wake-up alarm.

Time and Temp is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions and all necessary hardware for the DIY enthusiast.

ZT 119 £99.50

DE 700

DE 710

ELECTRONIC COMPASS

Two electronic compasses featuring the very latest aircraft type quadrature circuit for total accuracy. Just take a look at some of the outstanding features, which make conventional compasses a thing of the past.

- Automatic magnetic compensation. Even the most expensive conventional compasses have problems with strong magnetic fields in a vehicle. But Zemco's quadrature circuit system automatically corrects to obtain precision accuracy.
- 360° hi-tech display clearly shows the direction of travel
- Full colour illuminated display for easy reading day or night.
- Fits easily on to any dashboard allowing use by either driver or front seat passenger.
- Display is electronically controlled for steady, accurate reading.
- Easy to install in vehicle electrical system—or via the cigarette lighter adaptor included.

DE 700 £39.50

DE 710 £97.50

DE 730

INTERIOR LIGHT DELAY

How often have you groped to find your ignition switch in the dark? Just think how easy it would be if your interior courtesy light remained 'on' until the vehicle has been started. The Zemco Interior Light Delay makes this possible whereby an electronic delay keeps the courtesy light 'on' for 15-30 seconds after closing the car door.

The Interior Light Delay is simply installed on all vehicles and comes complete with fitting instructions.

SA401 £6.50

EXTERIOR LIGHT DELAY

No more stumbling around in an unlit driveway. Just walk away from your car in the knowledge that the lights will automatically switch-off after a pre-set time of from 30 seconds to 3 minutes.

SA402 £10.50

OVERSPEED ALERT

Decide the maximum speed at which you wish to travel and the Overspeed Alert will provide an audible warning when that speed has been attained.

ZT105 £13.95

WIPER DELAY

Wiper Delay provides a variable wiper interval of from 2 to 20 seconds and is equally suitable for front or rear screens.

The Wiper delay is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions.

DE 730 £13.50

ZEMCO

DRIVING COMPUTERS

DCS 360

The very latest in driving computer technology. The DCS 360 is the first computer to automatically re-set when fuel is added to the tank. It offers an exciting range of functions including two memories for short and long trips and an analogue bargraph to display instant fuel economy. Instantly convertible from imperial to metric measurements—ideal for buying fuel in litres whilst still measuring consumption in miles per gallon.

DCS 360 £152.50

Gooseneck Stalk
6607

£22.00

DRIVING COMPUTERS

DCS 300

Offers a wide range of fuel management functions including information on 'range'—i.e. how much fuel in the tank, how far and how long you can travel without refuelling.

The DCS 300 incorporates a Cruise Control with separate command module. The DCS 320 has the same functions as a DCS 300, but comes without a Cruise Control.

DCS 300 £199.50

DCS 320 £139.50

ZT-4 FUEL MANAGER

Provides accurate information on instant fuel economy in addition to showing the amount of petrol used. Speed, time and distance displays are also incorporated. It provides instant convertibility between imperial and metric measurements.

HAND HORN

Driven by Freon 12 gas canister, with one straight horn. A single low and powerful note.

KDP1 £4.98

Refill for KDP1

K1 £3.19

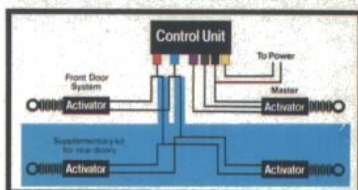

SECURON CENTRAL DOOR LOCKING

No more walking round the car to make sure your passengers have locked their doors.

No more neck-twisting gymnastics to unlock the passenger doors.

With Securon central door locking you can let all your passengers in at once. So no one has to stand around in the rain on a busy road.

● Independent door locking and unlocking, with the existing child locks unaffected.

● Your existing car key continues to operate the locks.

● The Securon central door locking system is perfectly matched to all makes of car, and once fitted it's totally concealed.

● Securon have developed this system to be totally compatible with all makes of car and function with existing door lock mechanisms.

● Securon central door locking is designed for ease of fitting and no specialist tools are required. No specialist knowledge is needed to understand it.

● There are two interdependent systems—both of which can easily be fitted by yourself. If you have a 2 door car—or if you

hardly ever use the rear doors—you'll want to fit the Securon Front Door System.

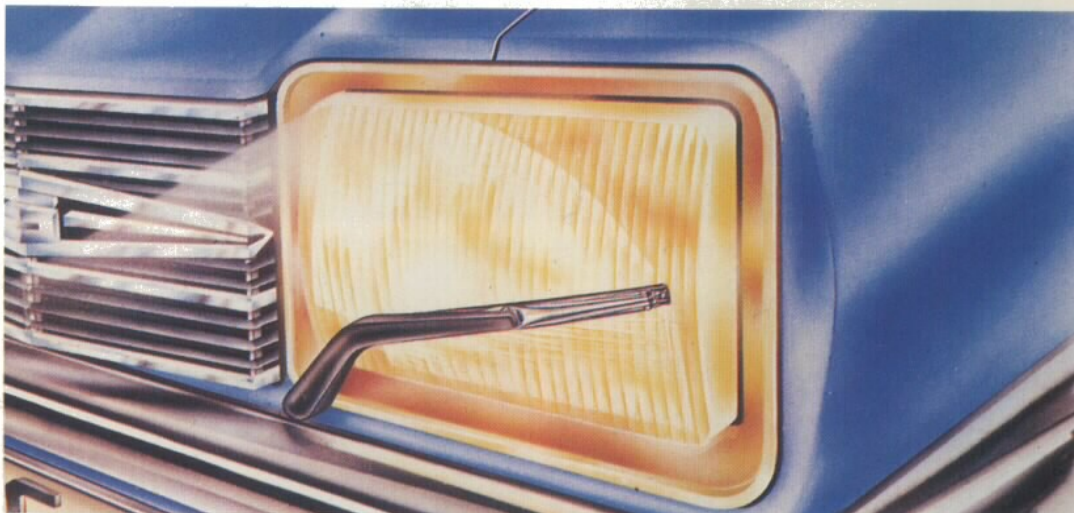

If yours is a 4 door car and you want the all-round benefits of Securon central door locking, you'll also need the supplementary Rear Door Kit. This can be fitted at the same time as the Front Door System, or at a later date if you wish.

Central Door Locking System, Front Doors.

SEC1000 £62.10

Central Door Locking System, Supp. Rear Doors.

SEC1001 £51.75

HEADLAMP WASH/WIPE THE COMPLETE SYSTEM

CLEAN LIGHTS—IN SECONDS

The Securon headlamp WASH/WIPE is a highly effective and reliable system which maintains a brilliant light output from the lamps under the most difficult night driving conditions.

Already proven in Sweden, where headlamp cleaning is mandatory, the system is fitted as standard equipment by a number of leading car manufacturers.

High standards are required to meet the Swedish regulations, which specify that a headlamp must be cleaned within 8 seconds. Securon WASH/WIPE does it in less than 5 seconds.

POWERFUL DUAL ACTION

Twin hydraulic motors drive the self-parking wiper arms, operated by

high-pressure water from an electric pump which is mounted under the bonnet, well away from spray and mud. The pump also supplies water to the washer jets. Water from the motors is recirculated, and one filling of the WASH/WIPE reservoir will outlast that of an average windscreen washer.

At each sweep of the wiper blades a jet of water is directed at the headlamp through the moving arm. The combination of sweeping blade and powerful jet ensures thorough cleaning of the glass.

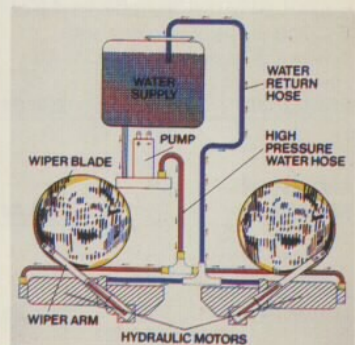

Securon recommend that the system be connected to, and activated with the car windscreen washers, preferably using a good headlamp wash/wipe or windscreen washer additive. In this way the headlamps are automatically cleaned every time the screen is washed. A switch can be used for independent operation if required.

EASY FITTING

Fitting is simple and straightforward, and can be carried out by any competent garage or DIY mechanic. Precise instructions and diagrams are included with each kit for cars specified on the application list. Installation time for an average car should be about 1½ hours.

The Securon complete system comprises:

1. A pair of arms and blades to suit either round or rectangular headlamps.
2. High pressure electric pump.
3. Two hydraulic motors.
4. Flexible water reservoir.
5. High and low pressure water hoses.
6. Brackets, electrical cable, connectors and screws.

7. Diagram and fitting instructions. Available for Alfa Romeo, Audi, BMW, Citroen, Datsun/Nissan, Fiat, Ford, Honda, Jaguar/Daimler, Mercedes, Mini, Opel, Peugeot, Renault, Rolls Royce/Bentley, Rover, Range Rover, Vauxhall, Volkswagen, Volvo.

SEDAN EQUUS

SERVOGLIDE XL POWERED WINDOW KIT

Once a luxury only on expensive cars, Servoglide XL now brings the safety and convenience of power operated windows within reach of the majority of motorists. It can be fitted to most cars in a matter of hours, at a cost much lower than original equipment window lift systems. Designed to be discreet and unobtrusive, Servoglide XL adds style and elegance to a vehicle, while providing finger-tip control of both the driver and passenger windows. The comprehensive kit of parts includes fully illustrated fitting instructions to guide you through installation. Total fitting time should be less than a day.

- New Slimline Motor
- Centre Console Switching
- Comprehensive Parts Kit
- Fully Illustrated Fitting Instructions

The suitability of Servoglide for a wide range of cars has been achieved by incorporating the existing winder mechanism into the system. Lucas manufactured, it has at its heart a powerful 12V motor, slimline in design which means that it's better suited to working within the narrow confines of the modern car door and which powers through a flexible drive a low profile universal gearbox mounted on the window regulator mechanism. Should electrical power fail the regulator mechanism can be operated manually with the reserve handle provided.

The system incorporates centre console 'Rocker' type switches which operate the windows when continuous pressure is applied to the switch.

Also included is a thermal cut-out and window limit switches, provided to ensure adequate protection during operation.

Top Alarm

EUROPE'S MOST RESPECTED RANGE OF VEHICLE SECURITY

GAMMA ALARMS have been established in the UK for over 7 years and are approved and fitted by many leading car manufacturers e.g. RENAULT, PEUGEOT TALBOT, TOYOTA, SAAB, CITROEN etc.etc. GAMMA ELECTRONIC SECURITY SYSTEMS have been tested and approved by leading Insurance Companies, Police Forces, Motoring Journalists, and major Fleet Users. The high level of efficiency and reliability has ensured that GAMMA ALARMS conform to the prestigious B.S.I. standard.

The great benefit of the GAMMA system is that, due to it's modular design, one can start out with a quite

basic system, which will protect the car but which can be added to at any time providing the driver with a very sophisticated security system. All GAMMA ALARMS are offered with a LIFETIME GUARANTEE against faults due to manufacturing error or component failure.

TOP 18

The ultimate security system. Features include: Remote control with two programmable key ring transmitters, Ultrasonic sensors, hazard warning light circuit, self-powered back-up battery siren. Compatible with all central locking systems, complete with plug-in connections, protection fuses, emergency over-ride key and hidden foot switch which will enable the driver to activate the anti hi-jack mode which immobilises the vehicle 60 seconds after the car has been stolen. TOP 10 has all the features of the TOP 18 plus an armour plated metal box self-powered siren.

TOP 18	£374.21
TOP 10	£374.21

SC

SC

A compact, radio-controlled alarm system which is fitted in the engine compartment. Features include: Two key ring transmitters (pre-coded) The unit incorporates a high power electronic siren, automatic reset, hazard warning lights flash when alarm sounds, engine immobilisation feature and voltage change activation. SCA identical features to SC plus self-powered recharging battery back-up.

SC	£193.08
SCA	£250.12

RBM

RBM

This model is "state of the art" vehicle alarm technology. Fitted inside the car, activated by voltage drop, engine immobilisation mode, auto reset of alarm, hazard warning lights flash, Two programmable key ring transmitters supplied which can also operate central door locking and electric window closing. Compatible with all Gamma sirens and MUS or USMR Ultrasonic sensors.

RBM	£161.69

Security

404

Zemco Auto Alarms all feature a unique integral design whereby the siren unit houses the micro-processor, the shock sensor, a battery back-up and a 115 decibel horn. They offer the ultimate in protection and have been selected by a number of car manufacturers as the 'state of the art'.

What type of alarms offer the best protection?

There are many types of alarm on the market—some very cheap, others extremely expensive. They range from simple ignition cut-off switches to sophisticated ultrasonic and infra-red devices. Generally, an alarm is passive or non-passive. What does this mean? It means that a passive system requires no action on the part of the driver (i.e. the alarm arms itself automatically) whilst a non-passive system can only be armed by some specific action. Driving habits are not easily changed and passive systems are much to be preferred. Passive alarms can be of various types. Two of the most popular are 'current sensing' and 'ultrasonic'. What is the difference? A current sensing alarm relies on pin-switches in the doors, bonnet or boot to detect entry whilst an ultrasonic alarm monitors sound reflections within the car's interior. Which is better? Experts disagree but current sensing devices have a reputation for fewer false alarms.

ZEMCO ALARMS

The alarms are passive, so you don't even have to remember to switch them on. When the ignition is turned off, the system is fully armed. All Zemco Alarms have a battery back-up system. So, even if a thief succeeds in cutting the car's battery cable, the alarm will sound loud and clear.

DESIGNED FOR EASY INSTALLATION.

SA404

An add-on Ultrasonic Sensor to provide double protection when used with SA-420 and SA-430 Alarms.

- Red L.E.D. to indicate vehicle is protected

SA 404 £49.50

SA420

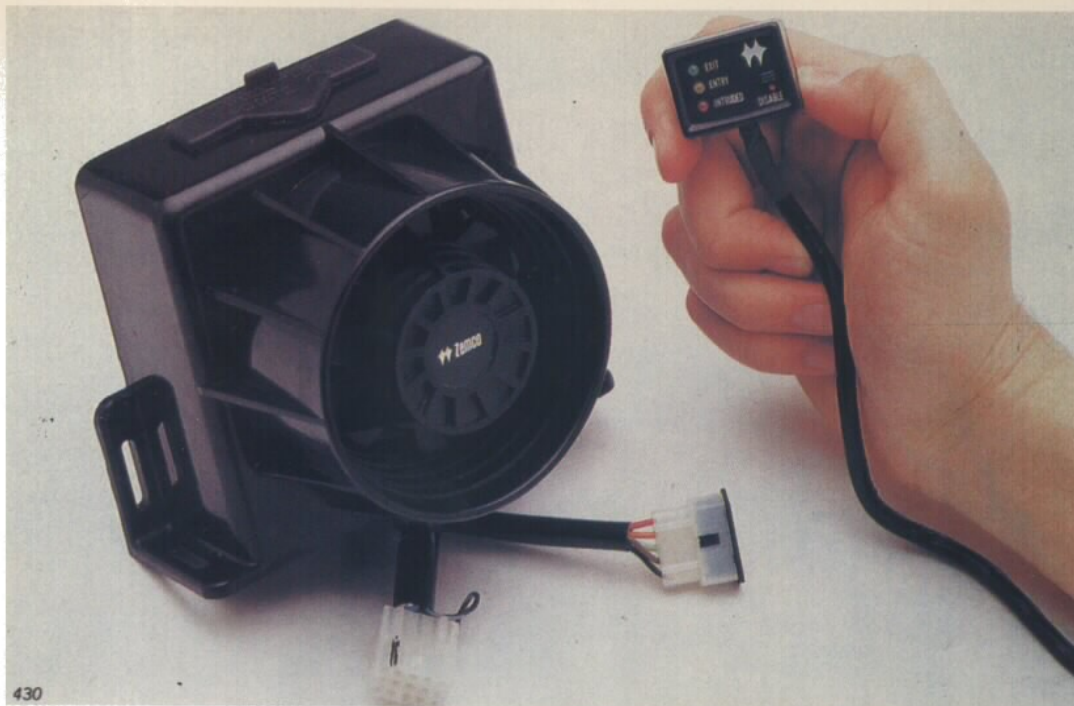

- Battery Back-Up. (Batteries included).
- Passive System is automatically armed with ignition key.
- Shock Sensor detects towing or jacking.
- Dome Light Circuit protects interior.
- Adjustable Length Contact Switches for boot and bonnet.
- Test L.E.D. checks installation and operation.
- Disable/Valet Switch deactivates alarm.
- Retriggerable Exit Delay resets when boot, bonnet, or doors are opened during the exit delay.
- Entry Delay adjustable from 0 to 30 seconds.
- Automatic Reset rearms alarm.
- 115 dB Siren.

SA 420 £59.50

420

ZEMCO

430

SA430 ALARM

Features:

- Battery Back-Up. (batteries included).
- Passive System is automatically armed with ignition.
- Shock Sensor detects towing or jacking.
- Dome Light Circuit protects interior.
- Adjustable Length Contact Switches for boot and bonnet.
- Test LED checks installation and operation.
- Disable/Valet Switch deactivates alarm.
- Retriggerable Exit Delay resets when boot, bonnet, or doors are opened during the exit delay.
- Entry Delay adjustable from 0 to 30 seconds.
- Automatic Reset rearms alarm
- 115 dB Siren.

Special features:

- Status Monitor shows exit, entry, intrude and has a disable switch.
- Smart Exit waits for door to close before starting delay.
- Chirptone when alarm arms.
- Warning Tone when entry delay begins.
- Auxiliary Output for flashing lights or horn.
- Outside Sensor protects ski racks, etc.

SA430 £89.50

SA431A REMOTE CONTROL

- Can be added to any Zemco Alarm.
- Allows alarm system to be activated and deactivated with a key chain size remote transmitter.
- Effective range is 100 feet minimum.
- Works with most active or passive alarms.
- Either flashes lights or chirps horn for confirmation of arm/disarm.
- For safety, the system will not trigger while driving.

Special feature:

- System can be armed or disarmed either with remote control or with ignition switch.

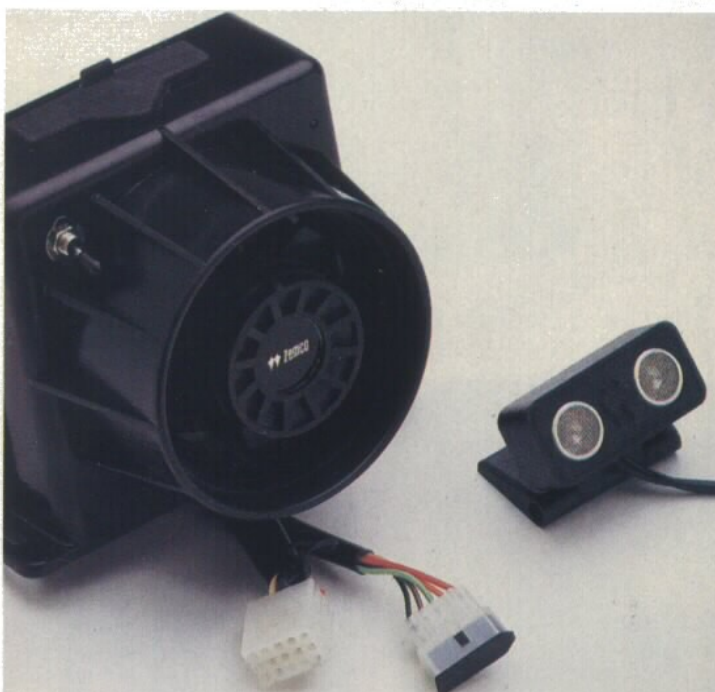

SA431A £59.50

SA 435 CENTRAL LOCKING INTERFACE

The Central Door Locking Interface compatible with all Zemco Alarms. For use only in conjunction with SA-431 Remote Control and with vehicles with existing central locking systems.

- Simultaneous locking/unlocking of car doors and arming/disarming alarm

SA 435 £36.50

SA440 ALARM

- Battery Back-Up (batteries inc)
- Passive System is automatically armed with ignition.
- Shock Sensor detects towing or jacking.
- Adjustable Length Contact Switches for boot and bonnet.
- Test LED checks installation and operation.
- Disable/Valet Switch deactivates alarm.
- Retriggerable Exit Delay resets when boot, bonnet, or doors are opened during the exit delay.
- Entry Delay adjustable from 0 to 30 seconds.
- Automatic Reset rearms alarm.
- 115 dB Siren.

Special features:

- Ultrasonic Sensor detects any motion inside vehicle for total coverage.
- Ignition Kill.

SA440 £99.50

SA403 VEHICLE ALARM MOTION DETECTOR

- Guards against towing or jacking.
- Can be used with vehicle horn.
- Works in conjunction with Zemco alarms.
- Sensitivity adjustment.
- Includes On/Off switch.

SA403 £6.95

SA405 VEHICLE ALARM BIAxIAL PIEZO SHOCK SENSOR

- Senses high frequency shock such as tampering with glass or wheels.
- No false alarms from wind or slight movements
- No moving parts—mounts in any position.
- Works in conjunction with Zemco alarms.

SA405 £17.20

SA406 IGNITION CUT-OFF SECURITY SYSTEM

- Compatible with standard, high energy or electronic ignition systems.
- Hidden switch disables entire ignition system
- Will not damage ignition as ordinary switch can.

SA406 £5.95

431 Remote

AUTO ALERT SUPER PAGING ALARM SYSTEM

The Auto Alert System round-the-clock protection for cars, commercial vehicles, motorcycles, caravans, and boats.

If thieves tamper with your vehicle, the Auto Alert will immediately send a personal dial tone signal to a receiver that is small enough to fit into your pocket.

The super sensitive receiver has an effective working range of up to 2 miles, this will of course vary according to the terrain. The signal will penetrate even multi-storey buildings and underground car parks. The Auto Alert has a built-in siren relay that can simultaneously scare off the thieves. System includes transmitter, pocket pager, two piezo ceramic sensors, coaxial cable, pin switches, batteries.

Auto Alert AL1012	£137.36

The De-Luxe Auto Alert System offers all the functions of the AL1012, together with LED display, arming pager, and automatic arming when ignition is turned off.

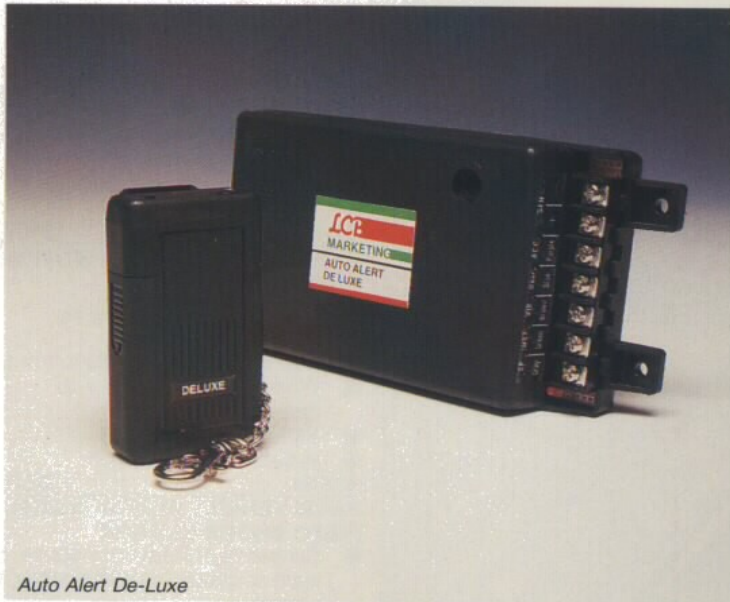

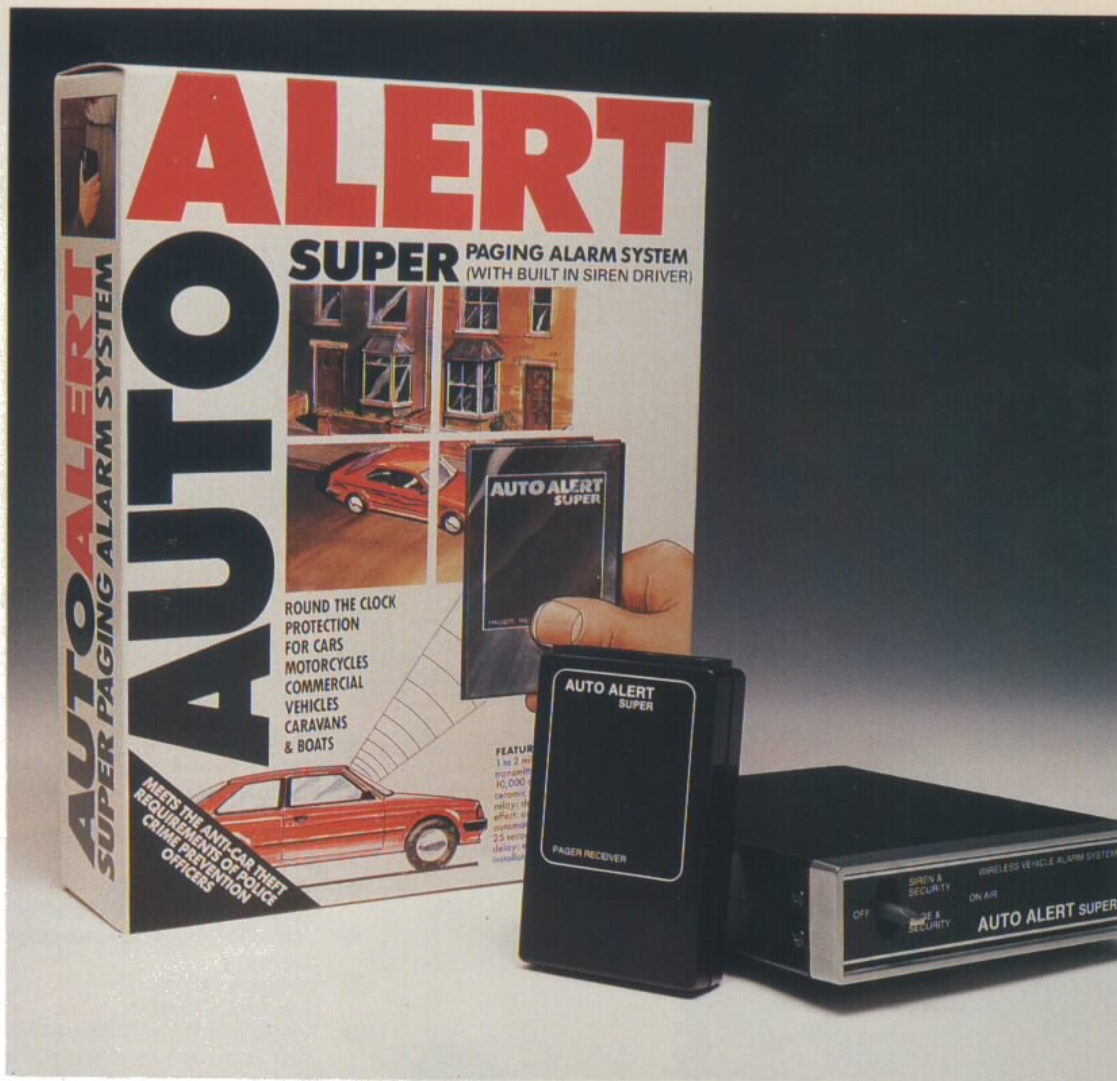

De-luxe Auto Alert AL1015	£155.84
Extra De-Luxe Pager AL1020	£92.35
P.A. Speaker/Siren AL1011	£17.48
Extra Sensors AL1010	£11.42
Window Tape Aerial AL1013	£24.38

AUTO REMOTE

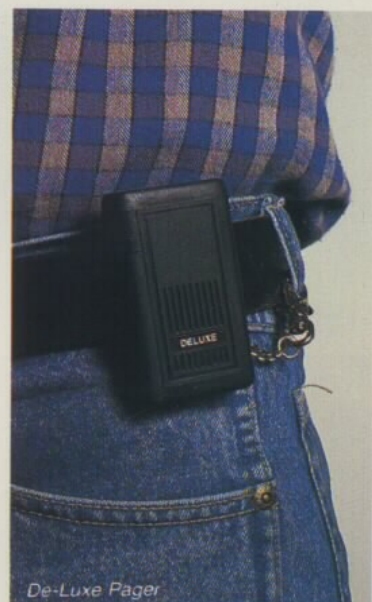

Remote Control Alarm System controls central locking (if required), as well as the alarm by the two 'keys' supplied.

Auto Remote ALR1001	£101.80
-------------------------------	----------------

(Auto Remote can be used in conjunction with any of the following: Auto Lock, Autoguard, Autosonic, Autodetect and any siren shown opposite).

Auto Alert De-Luxe

De-Luxe Pager

Auto Remote

L.C.B.

AUTO ULTRASONIC ALARM SYSTEM

Auto Ultrasonic Alarm System, is one of the smallest ultrasonic alarm systems available, easy to fit, adjustable coverage, L.E.D. warning when armed. Once fitted it is fully automatic, all you have to do is remember to make sure doors, bonnet and boot are closed within approximately 30 seconds after turning the ignition off. Complete with 120 dB piezo siren. Fitting instructions enclosed.

FEATURES:

- * Sophisticated signal processing circuit with crystal oscillator.
- * Single two-way (TX and RX) detecting transducer.
- * Detecting coverage adjustable.
- * High reliability and stability.
- * Easy installation.

Auto Ultrasonic Alarm System

ALP1021 £63.83

(Auto Ultrasonic Alarm System can be used in conjunction with Auto Detect).

AUTO PROTECT TWO

- * Voltage Sensing Alarm system with flashing L.E.D. when armed.

FEATURES

- * Flashing indicator warning
- * Instant trigger bonnet & boot connection
- * Ignition kill
- * Flashing L.E.D. when armed
- * 5 second entry delay
- * 20 second exit delay
- * Automatic reset
- * Complete with hardware and wiring harness
- * Simple installation
- * Small compact & waterproof

ABOUT THE SYSTEM

The Auto Protect Two works off the vehicles electrical system and is activated by any current drain on the battery (i.e. courtesy lights, brake lights or ignition system).

The Auto Protect Two will protect the bonnet and boot by the trigger section of the alarm. If the bonnet or boot is tampered with, this will set the alarm in motion instantly (there is no delay).

Once activated the indicators will flash as well as give out a loud high decibel siren sound. The Auto Protect Two will automatically reset after 30 seconds.

Auto Protect Two

ALP1025 £51.12

SIRENS

For use with ALR1001 and other manufacturers alarm systems

Super Mini Siren 120dB

ALR1003 £11.70

Senses attempted glass breakage, forcing of doors etc.

AL1014 £18.81

Suitable for use with Auto Alert, Auto Alert De-Luxe, Auto Remote and Auto Ultrasonic Alarm System.

Auto Protect Two

Auto Ultrasonic Alarm System

Auto Lock

L.C.B.

Security

PAGE ALARM, as the name suggests is based around a sleek pocket pager which is carried by the driver. Should the vehicle be hit or tampered with, the **PAGE ALARM** will immediately transmit a signal to the pager which will bleep, alerting the carrier of the problem—the signal can be received over a distance of up to 200 metres. An optional siren and ultrasonic detector can also be fitted to provide extra physical protection.

However, the **PAGE ALARM** really comes into its own when the vehicle is fitted with a car phone. When the driver is away from the vehicle, a second bleep code on the **PAGE ALARM** can alert him of an incoming call to his car phone. This facility will prove to be extremely useful for people who make many short calls during the day when they leave the car nearby for only a few moments. Doctors, delivery drivers, sales staff, surveyors and many more for whom the call transfer facility offered on most car phones is of little practical use will find the **PAGE ALARM** invaluable.

PAGE ALARM is the **ONLY** approved system on the market—a quality product already endorsed by companies such as Motorola, Marconi and Unique Air.

PAGE ALARM PA2

Includes a transmitter, digital encoder, alarm control system with vibration sensor and contact inputs, interface cable for car radio antenna duplexing, detachable wiring harness, digital pager with two unique codes for car phone input and notice of alarm activation.

PA2 £169.95

SIREN AND RADIO KEYS

For use with Page Alarm
Dual tone electronic siren of 120 dB/30 watts with "two" digitally coded radio keys.

COM003 £69.95

VOLUMETRIC ULTRASONIC DETECTOR

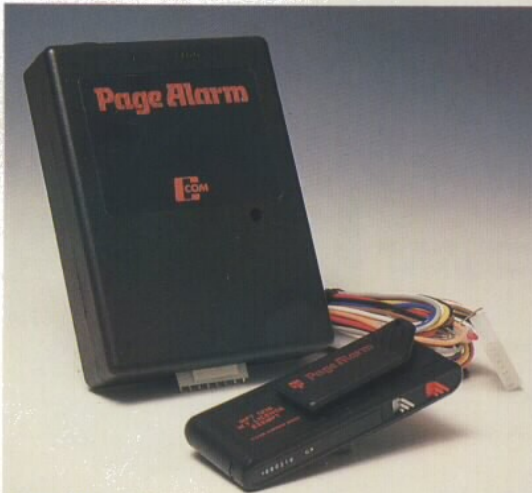

For use with Page Alarm
Connects directly to Page Alarm to detect any movement inside the vehicle. Will also detect air disturbances caused by door opening or window breakage.

COM004 £29.95

SIREN ALARM

Stand Alone System
Dual tone electronic siren alarm 120dB/30 watts power. Couple system.

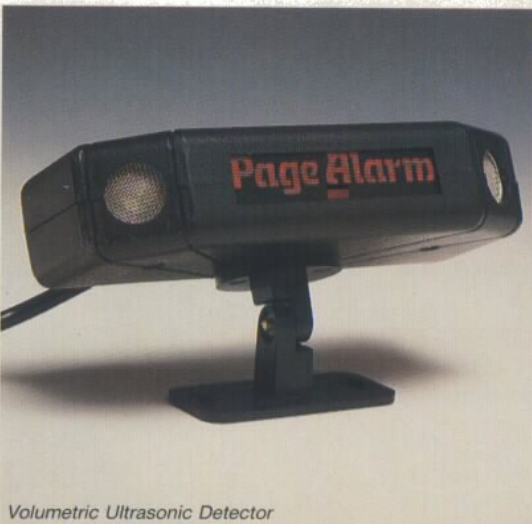

COM005 £59.95

Siren Alarm

STRONGARM

STRONGARM—Considered the toughest anti-theft device on the road today! STRONGARM is designed to fit all types of vehicle, from Minis to Lorries and was invented by an expert with practical experience in all aspects of vehicle theft!

STRONGARM hooks round the foot pedal and locks on to the steering wheel. Its advantages over other products are:

- Strength—made from solid steel weighing 2.2kg
- Ease of use—(once adjusted takes seconds to fit)
- Versatility—fits cars (including automatics), lorries, buses etc.
- Fits over padded steering wheels
- The lock has over 3000 different key configurations
- Quality—controlled at all stages of manufacture
- Price—the price is very competitive for the level of protection provided.
- British made.

STRONGARM has the AA Seal of approval and is recognised as a real deterrent by many motoring organisations and insurance companies.

SHIFT-LOCK

Shift-Lock securely locks together the gear lever and the hand-brake. It gives a high level of car security which is visible to the would-be intruder. Quickly fitted and easily locked with a push-button snap lock. Simple fully detailed fitting instructions included.

SL2001

£19.13

HELLA AUTO-ALARM A (Can be combined with Auto Alarm C or D).

- Activates when doors, bonnet or boot opened.
- Prevents jump-starting.
- Activates if radio removed.
- Switch on by concealed master switch.

5 AA 003 525-801

£64.22

HELLA AUTO-ALARM B (Can be combined with Auto Alarm C or D).

- Same as Alarm A but controlled by an outside lock and safety key.
- The ignition and starter is disabled electronically when the alarm is actuated.

5 AA 005 191-801

£114.95

HELLA AUTO-ALARM C (Add-on unit)

- Add on unit for wheel and towing protection.
- Microprocessor memorises the position of the vehicle.
- Alarm activates if this position is changed.
- Activates if wheels removed or vehicle towed or loaded.

5 AA 005 193-801

£230.00

HELLA AUTO-ALARM D (Add-on unit)

- Add-on unit for passenger compartment protection.
- Transmits a protective ultrasonic field inside the car.
- Activates if window broken or soft top opened.

5 AA 005 192-801

£127.86

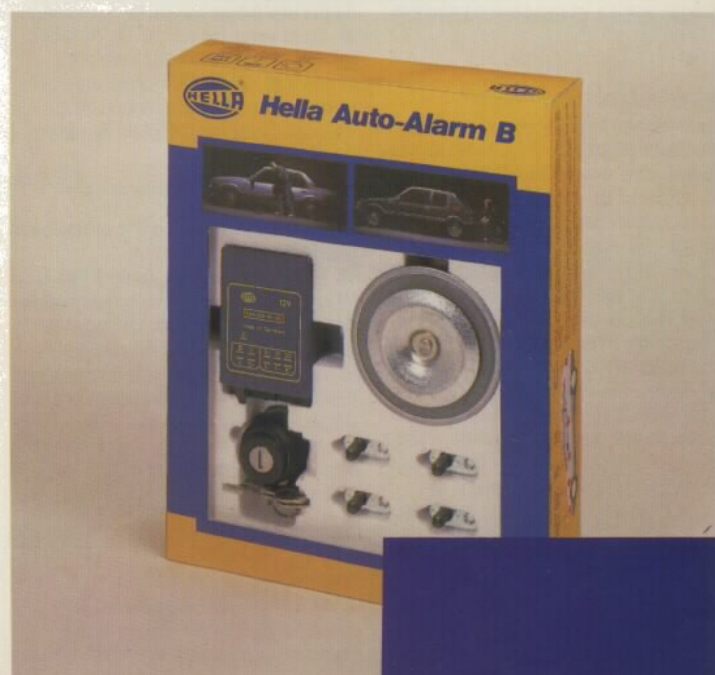

SOUNDSAFE

This simple mask has proven to be remarkably effective in protecting expensive car audio systems against theft.

Because just by clipping SOUNDSAFE over your stereo before leaving the car gives the impression that there is only an inexpensive radio. Hardly tempting, even to the most desperate of thieves. And after all, the next car's sure to have something more worthwhile fitted, so why take a chance on yours? SOUNDSAFE (fits all DIN style car tuner/cassette/CD/DAT players)

MET0038M Medium £35.79

MET0038S Small £34.72

MET0038SS Super Small £33.88

POPPER SHOPPER

This big strong shopping bag has 2 side straps with press stud fixings to hold the bag secure while you drive. 2 or more bags can be strapped together. Available in yellow, blue or pink.

MET0101 £8.77

BOOT TIDY

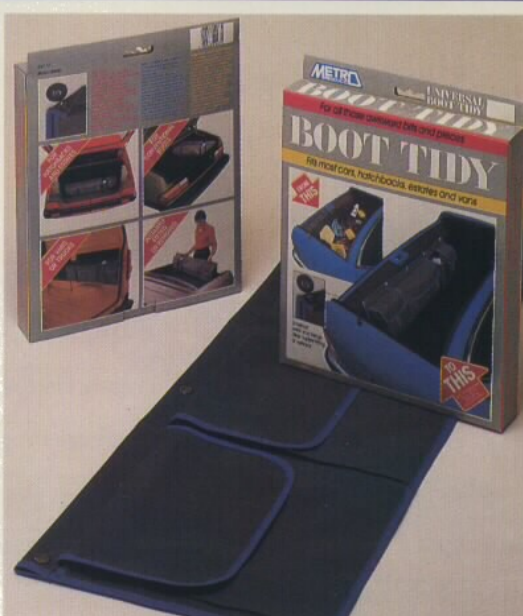

At last somewhere to keep all those awkward bits and pieces that roll around in the back of your car. Fitted simply by popping the press studs together and just as easily removed.

MET0077 £11.30

FIRST AID KIT

A range of first aid items packed in a red nylon zippered bag. Room to add personal requirements. All dressings are British made and sterilized.

MET0043 £8.61

METRO

SUPER IGNITER SPARK PLUGS

- No Servicing.
- No Regapping.
- Consistent Performance.
- Optimum Fuel Consumption.
- Extra Long Life.

Maintenance costs of motor vehicles have soared in recent years. To combat this to some extent, the manufacturers have extended servicing periods, some items like tyres, brake linings/pads, lubricating oil etc. now have considerably longer lives yet replacing spark plugs at about 10 or 12,000 miles is still called for. This is because the conventional spark plug has not changed significantly in basic design since the early days of motoring.

Super Igniters change all this. They operate on a different principle and after more than 20 years of proving in America and Japan, are being made more generally available. They have many times the life of conventional spark plugs and do not need cleaning: neither do they need their spark gaps reset—indeed it is not possible to do so as they are fixed by the method of construction.

During their operational life, two things happen with conventional spark plugs which gradually reduce their efficiency and cause their ultimate failure. Firstly, the combined effects of combustion of the fuel/air mixture and burning effect of the spark cause the electrodes to erode to wider and wider gaps, requiring higher and higher voltage from the ignition system to continue producing sparks. At the same time, deposit from combustion collects on the insulator, in common with other internal parts of the combustion chamber. These leak away the high tension current so that less becomes available, and a time is reached when the plugs start to misfire, causing loss of power and wasted fuel, and starting becomes difficult. Hence the need for regular replacement of ordinary plugs.

With Super Igniters, the design principle substantially slows down the effects just described. Firstly, the electrodes are much larger so that the gap erosion is greatly reduced. Secondly, as the end of the insulator is approximately level with the electrodes, the spark glides across it at lower voltage than if the whole gap was air. Furthermore, as deposit builds up on the insulator, the spark glides across it at even less voltage and at the same time burns off some deposit, thus preventing it accumulating to the extent which occurs on conventional plugs.

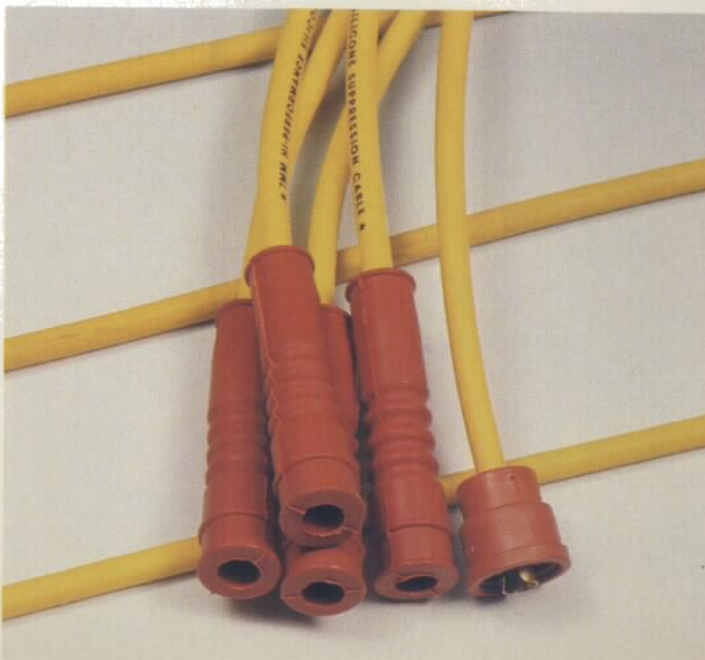

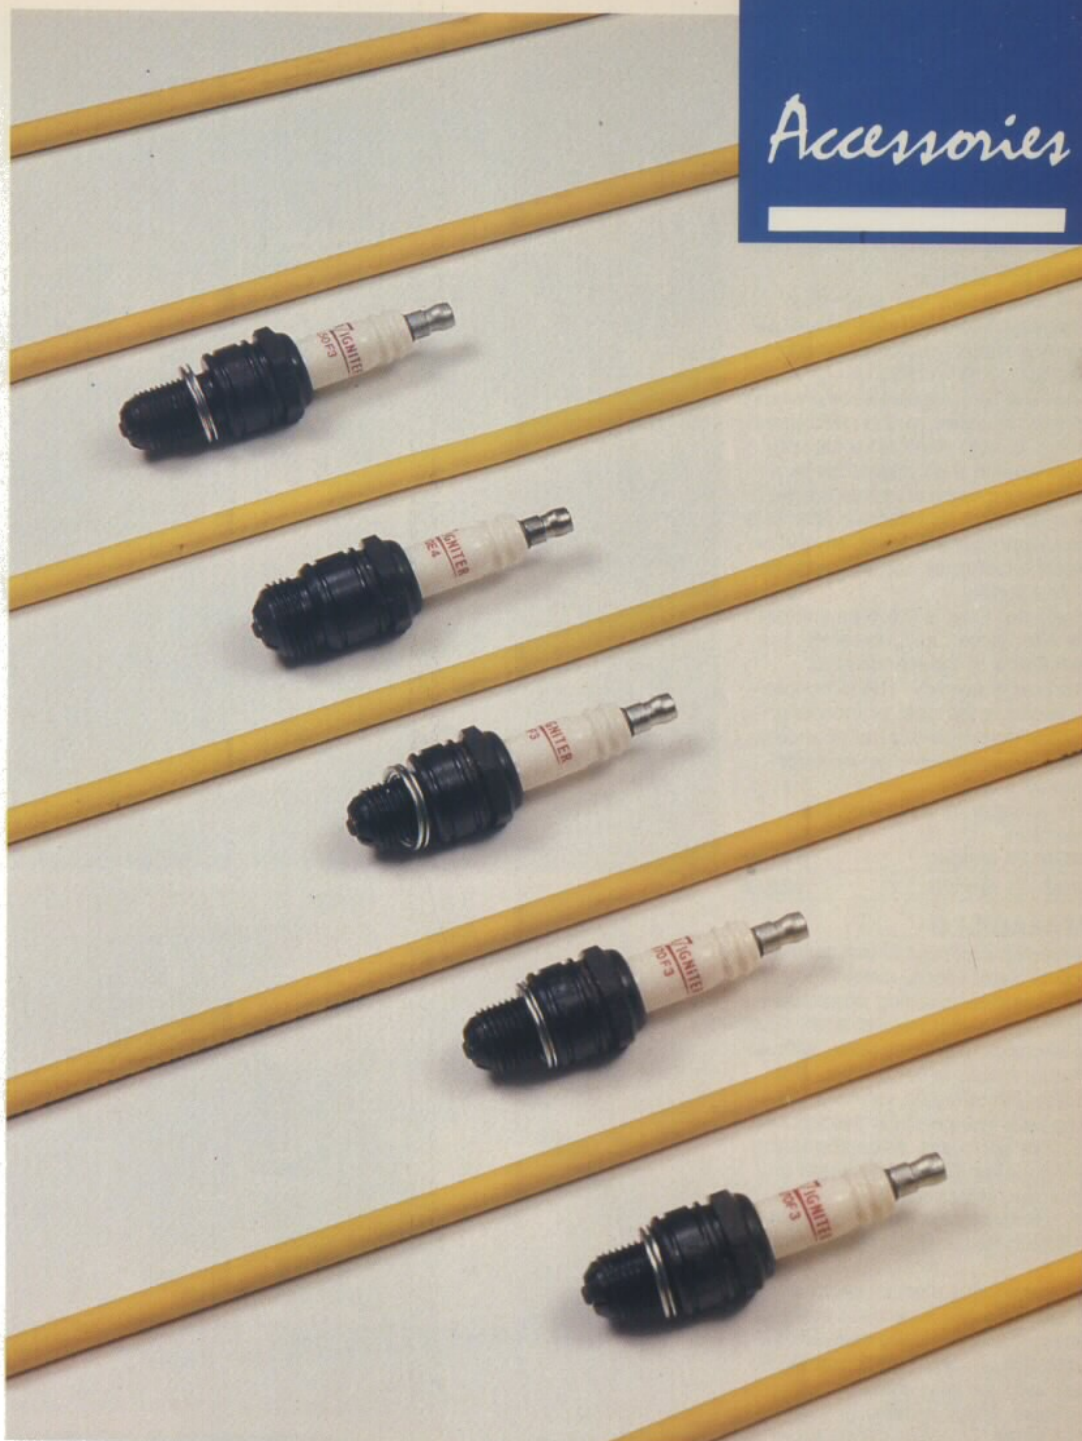

The net result is to compensate almost completely for the erosion of the electrodes, and so, with Super Igniters, consistent performance is maintained over many times the life of normal spark plugs, saving replacement and labour costs and that of fuel which would otherwise be wasted.

Available for most vehicles.

Please state make, model and year when ordering.

SI2001

£3.97 ea.

Accessories

SILICONE PLUG LEADS

High Performance Ignition Leads

- Leads remain flexible at all temperatures from -50°C to 260°C .
 - Silicone does not harden or crack or deteriorate to admit moisture and cause misfires.
 - Silicone resists petrol, oil and acid spillage.
 - Fully interference suppressed.
- Sets come complete and ready to fit your car.

Four cylinder set

C08001 **£9.43**

Five, six and eight cylinder sets.

C08002 **£15.90**

Please state exact make model and year of car when ordering.

COSMIC

Accessories

FILTER KING

The well known fuel saver from Malpassi. Tests and trials as well as many satisfied customers claim savings of 10%-15%.

The Filter King regulates the pressure of fuel delivered by the car's petrol pump to help maintain a steadier float level in the carburettor thus preventing expensive fuel surges and flooding. Its effective filter acts as an extra benefit to trap any dirt or water which may contaminate the petrol supply.

The Filter King is fitted as standard by Alfa Romeo and Maserati. Hundreds of thousands sold worldwide already. The relentless increase in the cost of motoring means that any aid to fuel economy must be considered an essential fitment.

Not suitable for cars with fuel injection.

MG3120 (large) £22.95

MG3121 (small) £20.64

ARMADILLO

Armadillo patented Liners enable you to carry foods, tools, merchandise, building materials—even pets in your car with ease. Then in seconds, converts back, with no interior cleaning necessary, to a passenger carrying vehicle. Specially designed for hatchbacks, estates and vans. Armadillo Liners are supplied for a wide range of vehicles, including: BL, Ford, Mazda, Opel, Peugeot, Renault, Vauxhall, Volvo, VW etc.

When ordering please specify either a full Armadillo when you wish to utilise the whole of the rear with the seats down, or a half Armadillo for use with the rear seats up.

Colours: Black, White.

Our Policy

SATISFACTION GUARANTEED

We want you to be pleased with all goods bought from Carnoissey. Your guarantee of satisfaction is that any item supplied by us that does not meet with your approval may be returned within fourteen days for either exchange or a full refund.

DESPATCH

Most orders are processed the day they are received and despatched within 48 hours. You will be notified if your order or part of your order is subject to unusual delay.

PRICES

In the past years most of our printed prices have been maintained for a full twelve months after publication of the Carnoissey catalogue. Occasionally, however, cost changes are inevitable due to inflation and exchange rate fluctuations on imported goods. We therefore reserve the right to change prices without notice. During the later months in the year up to date price amendment lists are available.

ORDER QUERIES

Please first check for our comments on all documents enclosed with your order. A quick telephone call to (0582) 471700 will in most cases be the simplest and most efficient way of answering any queries that may arise from your order. Please have ready the sales invoice supplied with the goods and ask for the Customer Service Manager whose first responsibilities are to look after you.

BACK ORDER/ CREDITS

We endeavour to hold good stocks of most listed items at all times. If for some reason we are unable to supply a particular item with your order we may
a) back order that item and send it on as soon as it is available or
b) if long delays are expected, cancel this part of your order and refund you or notify you that your account is in credit; you may choose to ask for a refund or use the credit as part payment for your next order.

VAT

Many customers over the last 12 months have requested that our prices include VAT. This we have now implemented and all goods are now priced including VAT at 15%. If the rate of VAT changes, obviously our prices will change accordingly. Please remember our prices include VAT when comparing prices.

LET US KNOW

If any aspect of our service has not met with your approval, we are anxious to know about it. Write to Philip Hammond, Managing Director, and your letter will receive prompt personal attention.

FERRARI TEAM JACKET

Sizes: 36" - 46"

A2002

£28.95

See page 130 for full range.
